SUNDAY

Clark Cabin Open 10am-4pm

12

11:00 AM – Photographing the Falls: Landscape Scenery –We will visit several places where a normal to wide-angle lens works well. Tips and tricks will be shared. Bring your own equipment.

1:00 PM – Photographing Nature: Close-ups and Telephoto – We will take you to areas to photograph the best fossils inches away from your lens and birds with a spotting scope or telephoto lens.

Clark Cabin Open 10am-4pm

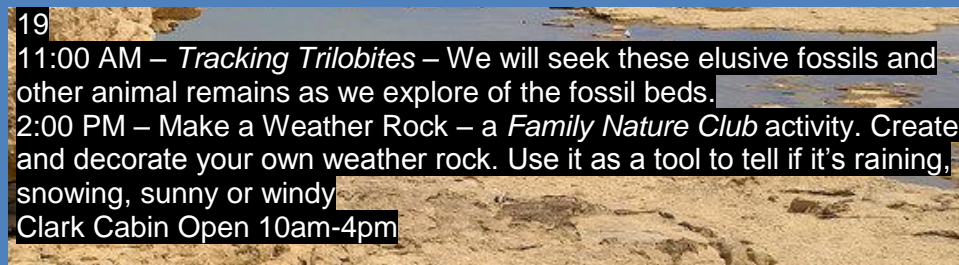

19

11:00 AM – *Tracking Trilobites* – We will seek these elusive fossils and other animal remains as we explore of the fossil beds.

2:00 PM – Make a Weather Rock – a *Family Nature Club* activity. Create and decorate your own weather rock. Use it as a tool to tell if it's raining, snowing, sunny or windy

Clark Cabin Open 10am-4pm

Family Paleontologist Camp

July 14 - 16

9:00 a.m. to 4:00 p.m.

Age: 12 to 16

Limited to 10 children accompanied by a parent, grandparent or legal guardian

Cost is \$150 per child / adult pair

Participants will experience the life of a paleontologist - everything from field collecting and cleaning fossils to studying and photography to writing in a field note book throughout the camp. During field collecting, participants will be able to keep what they find.

Because of the depth of this camp, participants must meet these criteria:

- 1) Children are between 12 - 16 years old as of July 1.
- 2) Parent, grandparent or legal guardian will agree to actively participate with the child for the duration of the camp.
- 3) Child must have a interest in fossils for at least 2 years prior to this camp.
- 4) Prefer that child has a career goal in paleontology and/or has their own fossil collection.

Priority will be given to first-time participants. Limit to 10 child / adult pairs. As you might gather, this "career camp" is not geared for those without a serious interest in fossils!
